

Introduction

This file is produced to help you understand the hierarchy of the ATC system. To simply look up a particular code, you might be better to use the "atc_alphabetical.pdf" file also available from www.msupply.org.nz

This file is based on a listing of ATC codes as supplied to us in November 1999. It is supplied free as a service to those who care about good medicine use by mSupply support.

Thanks to the WHO collaborating centre for Drug Statistics & Methodology, Norway, for supplying the raw data.

I have intentionally supplied these files as PDFs so that they are not quite so easily manipulated and redistributed. I am told there is no copyright on the files, but it still seems polite to ask before using other people's work, so please contact <whocc@nmd.no> for permission before asking us for text files.

mSupply support also distributes *mSupply* software for inventory control, which has an inbuilt system for reporting on medicine usage using the ATC system. You can download a full working version from www.msupply.org.nz.
